- Creating realistic and relevant training -

DRONES/UAVs BASIC OPERATOR

This 24 hour California POST Certified course gives new UAS public safety operators hands-on flying experience through skills and scenario-based training, knowledge of equipment options, UAS related technologies introduction, and legal aspects. Students will receive information on obtaining their FAA Part 107 Remote Pilot Certification and procedures for flying under an agency's FAA Certificate Of Authorization (COA). This class does not include prep or testing for FAA part 107.

This class is designed for agencies who have an established or are in the process of establishing a UAS program. It is open to communications dispatchers, law enforcement and fire personnel at the local, state, and federal level, emergency managers, and supervisors. Space is limited to ensure low student: instructor ratios.

We encourage your to bring your agencies drone to this training class for the best experience!

Monday-Wednesday
